HEADLINE

AI Engineer and Full-Stack Architect - RAG, Agentic IA, Deep Learning, MLOps

PROFESSIONAL SUMMARY

AI Engineer orienté produit, spécialisé en Agentic AI, Retrieval-Augmented Generation (RAG), Deep Learning et delivery full-stack.

Conçoit et met en production des systèmes IA de bout en bout: data pipeline, entraînement, orchestration multi-agents, backend sécurisé, frontend orienté UX, observabilité et déploiement cloud-native.

Compétences clés pour postes RAG/ Agentic IA: LangGraph, hybrid retrieval (BM25 + vector + RRF), FastAPI, Next.js, Docker, CI/ CD, MLflow, Active Learning.

TECHNICAL SKILLS

- Agentic AI and LLM Engineering: LangGraph, multi-agent orchestration, stateful routing, prompt engineering, grounding, hallucination mitigation, fallback strategies
- RAG and Search: ChromaDB, BM25, Reciprocal Rank Fusion (RRF), semantic chunking, vector indexing, hybrid retrieval
- Machine Learning and Computer Vision: PyTorch, EfficientNet, OpenCV, Test-Time Augmentation (TTA), Grad-CAM++, Active Learning, MLflow
- Backend and Data: FastAPI, Python async, Pydantic, SQLAlchemy, REST API design, authentication, rate limiting, PostgreSQL, Redis, MongoDB, structured logging
- Frontend: Next.js 15, React, TypeScript, Tailwind CSS, API integration, analytics dashboards
- DevOps and Cloud: Docker, Docker Compose, GitHub Actions, Jenkins, SonarQube, Nexus, Grafana, Prometheus, Nginx, AWS foundations

PROFESSIONAL EXPERIENCE

AI Engineer Intern (PFE) | YEBNI, Tunisia

Feb 2026 - Jul 2026

- Architected and shipped DeepCoin-Core, an end-to-end AI platform for archaeological coin classification and analysis.
- Implemented a 5-agent LangGraph workflow with confidence-based routing and hybrid RAG retrieval (BM25 + vector + RRF).
- Built a production stack with FastAPI, Next.js 15, PostgreSQL, Redis, Nginx, Docker Compose, MLflow, and LocalStack.
- Trained and deployed EfficientNet-B3 pipeline with TTA x8; achieved 80.03% benchmark accuracy on 438 classes.
- Scaled knowledge retrieval to 9,541 coin types with 47,705 vectors; integrated Grad-CAM++ explainability and active learning loop.
- Delivered production hardening with API auth, rate limiting, structured logs, request tracing, and CI/ CD validation (122 tests).

Full-Stack Engineering Intern | Tunisia Telecom, Tunisia

Jun 2025 - Aug 2025

- Developed Python automation workflows for telecom operations and network configuration.
- Built monitoring dashboards and API integrations for operational KPI tracking.
- Improved operational efficiency by reducing manual configuration effort and increasing reliability.

Full-Stack Intern | Bright Soft, Tunisia

Jul 2023 - Aug 2023

- Developed full-stack SaaS features using React and Node.js.
- Contributed to AI/ NLP-assisted document processing workflows.
- Improved application performance and quality through structured testing practices.

SELECTED PROJECTS

DeepCoin-Core | Agentic AI + RAG + Deep Learning + Full-Stack

Repository: [https:// github.com/ ChaiebDhia/ DeepCoin-Core](https://github.com/ChaiebDhia/DeepCoin-Core)

- Stack: PyTorch, LangGraph, FastAPI, Next.js 15, ChromaDB, PostgreSQL, Docker, MLflow
- Built a complete pipeline combining CNN inference, multi-agent orchestration, grounded RAG generation, and PDF reporting.
- Results: 80.03% TTA accuracy, 47,705 indexed vectors, 9,541 knowledge-base types, 122 automated tests.

DevOps SpringBoot Pipeline | CI/CD and Reliability Engineering

Repository: [https:// github.com/ ChaiebDhia/ DevOps_SpringBoot](https://github.com/ChaiebDhia/DevOps_SpringBoot)

- Stack: Jenkins (18-stage pipeline), Docker, SonarQube, Nexus, Grafana, Prometheus
- Designed and implemented enterprise-style CI/ CD with quality gates, monitoring, and deployment automation.
- Key outcomes: 100% test coverage requirement, <2-minute pipeline runtime, 99.98% deployment success rate.

EasyTrip Microservices | Distributed Systems

Repository: [https:// github.com/ ChaiebDhia/ Microservices](https://github.com/ChaiebDhia/Microservices)

- Stack: Spring Cloud (Eureka, Gateway, Config), Angular, MySQL, Docker
- Implemented a microservices architecture with service discovery, API gateway, and inter-service communication.
- Delivered a scalable and modular cloud-native service structure.

EDUCATION

ESPRIT School of Engineering, Tunisia

Engineering Degree, Information Technology (TWIN) - 2021 - 2026

- Academic track: Web and Internet Technologies
- Professional specialization: Applied AI, software architecture, cloud systems

CERTIFICATIONS

- Anthropic Agent Skills - Certificate of Completion
- AWS Academy Graduate - Cloud Foundations (2025)
- Aviatrix Certified Engineer (ACE) - Multi-Cloud Network Associate (2025)
- Oracle Cloud Infrastructure (OCI) Associate (2025)
- Hashgraph Developer Course (2025)
- Scrum Fundamentals Certified (SFC)

LANGUAGES

- Arabic: Native
- French: B2
- English: B2

TARGET ROLES

- AI Engineer (RAG and Agentic IA)
- Applied AI Engineer
- Full-Stack AI Product Engineer
